

**Note:** The following is written before your work has been checked. It is just an example of how we approached the same task at Dabbl and not meant to be treated as a standart.

### **Test scenarios for 'My Recent Earnings' screen:**

Run the following scenarios with both - iOS and Android - Dabbl applications.

Preconditions: create a new Dabbl app user account

1. Navigate to "My Recent Earning", verify "Dabbl" activities and "Referral" activities implemented as a single screen with two tabs - "Dabbl" and "Referral"
2. "Dabbl" tab:
  - 2.1. Do not complete any tasks, verify there is no data under the "Dabbl" tab with the "No recent earnings... keep Dabbling!" text message
  - 2.2. Complete an experience, survey or from the web, verify Date and Time is displayed in the following format MM/DD/YYYY 00:00am/pm
  - 2.3. Complete an experience, survey or from the web, verify the most recent activity record goes on top (*after checking with the Product owner*)
  - 2.4. Complete an experience "From Dabbl", note earned points, verify the same amount is displayed under "Earned" in the activity record
  - 2.5. Complete a survey from "Surveys", note earned points, verify the same amount is displayed under "Earned" in the activity record
  - 2.6. Watch an add "From the Web", note earned points, verify the same amount is displayed under "Earned" in the activity record
  - 2.7. Add points to the user's account via the Support Dashboard, verify the same amount is displayed under "Earned" in the activity record (*I understand, you didn't know about the Support part*)
  - 2.8. Complete an experience "From Dabbl", verify the source is "Dabbl"
  - 2.9. Complete a survey from "Surveys", verify the source is "Survey"
  - 2.10. Watch an add "From the Web", verify the source is "From the Web"
  - 2.11. Add points to the user's account via the Support Dashboard, verify the source is "Support"
  - 2.12. Complete 20 tasks - From Dabbl, Surveys or From the Web, verify all 20 are listed under "Dabbl" tab
  - 2.13. Depending on the screen size, verify the list of completed tasks is scrollable
  - 2.14. Complete 21st task, verify only 20 most recent activities are listed under "Dabbl" tab
3. "Referral" tab:

Here go all the referral scenarios:) (*ACs criterias we had for this part are outdated, sorry*)
4. Tap the support email address link, verify the "Compose" screen of the default email application has "[support@getdabbl.com](mailto:support@getdabbl.com)" in the "To" text field.

Questions to clarify with the Product owner:

1. Navigating between tabs: swiping, tapping the tab label, or both?
2. Date/time is local to the user?
3. Most recent transactions go on top?
4. Mockups (*I haven't shared mockups with you, I know, but the screen and its tabs is implemented as it was on those mockups*) headers in the order that contradicts with acceptance criterias: mockups' header order - Date, Earned, Source; ACs - Date, Source, Earned. Which one is correct?

## Related bugs:

### Title:

A: Tapping support@getdabbl.com on Recent Earnings screen includes 'mailto:' into the addressee's string

### Steps:

On the Recent Earnings screen, tap support@getdabbl.com email link.

Expected: The opened default email client has support@getdabbl.com in the To: field

Actual: mailto: is also included in the email string thus the email client complains highlighting it red.

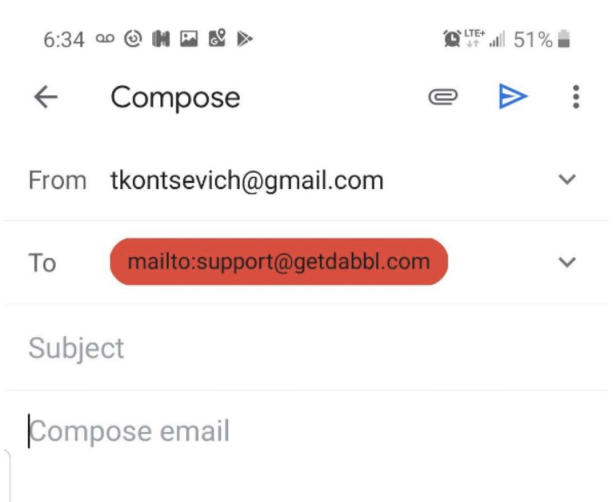

Please see the screenshot attached

### Environment:

Android Production 1.30

Android Test 1.0.622

### Screenshot:

**Title:**

A: "Recent Earnings" uses UTC timestamp instead of local to the user

**Steps:**

1. Complete a Dabbl experience, From the Web or Survey
2. Check Timestamp under 'Dabbl' on the "My Recent Earnings" screen

Expected: The timestamp is local to the user

Actual: UTC timestamp

**Environment:**

Android Production - 1.30

Android Test - 1.0.622
